

## ABSTRACT

Travis County 2017 Submission

Best IT Collaboration Among Organizations

Dallas, Tarrant and Travis County Prosecutor Module

*The purpose of the Prosecutor Module was to create the premier Texas Prosecutor Case Management System via a shared services agreement between Dallas, Midland, Tarrant and Travis Counties. Through this collaborative effort we have created three web-based applications that have interoperability between jurisdictions, shared costs, established standards for electronic data transmission, and easy secure access to stored digital evidence. With a law enforcement agency portal and a defense attorney portal, it improves both the visibility and efficiencies throughout the life cycle of a case, saving the county both time and money. During its development two additional counties – Potter and Armstrong joined the collaborative effort.*
